

Fabrikem Paint Repellent (PR)

Graffiti Repellent for Concrete & Masonry

FABRISHIELD Paint Repellent (PR) is a series of clear, penetrating sealers and liquid repellents which provide protection of concrete and masonry surfaces against both water ingress and graffiti application (paint and marker).

Fabrishield Paint Repellent (PR) is formulated with a unique, proprietary blend of polymers, organo-silanes and siloxanes.

FABRISHIELD Paint Repellent (PR) is compatible with all other FABRISHIELD water repellents and sealers.

Fabrikem Manufacturing Ltd. offers the most advanced technologies for cleaning and protecting concrete and masonry surfaces. With over 50 years experience in concrete and masonry construction chemicals, Fabrikem is your trusted source for advanced masonry cleaners, concrete sealers, concrete and masonry water repellents and **graffiti repellents**.

Contact a Fabrikem representative or your local Fabrikem distributor for additional product information and specifications.

Graffiti Control

Graffiti Repellent Technologies
for Concrete and Masonry

Fabrikem Paint Repellent (PR)

FABRISHIELD Paint Repellent (PR) modifies the concrete and masonry surface to protect from water ingress and graffiti with the following benefits to conventional treatments:

- Permanent Protection
- Chemically Bonded
- Repels Water and Paint
- Passes Efflorescence
- Passes Vapour
- Does not alter surface appearance
- Reduces maintenance costs for graffiti control

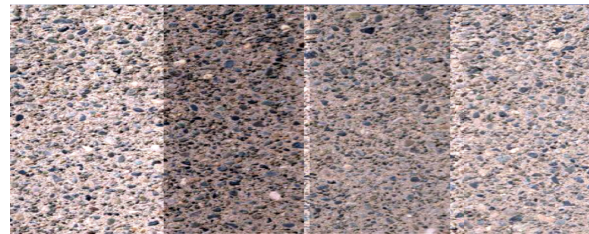

WHICH SIDE ARE YOU ON?

Graffiti Control and Mitigation has been a challenge for property owners for many decades. Graffiti Protection Systems originated with High Density Coatings (HDC) and evolved to Sacrificial Coatings. HDC creates a separate set of challenges to the owner as they alter the surface appearance and entrap efflorescence and water vapour. HDC are difficult and expensive to remove and although protect the surface from graffiti; the offsetting challenges are just as costly or more costly to the owner. Sacrificial Coatings also alter the surface appearance, entrap efflorescence and vapour but are easily removed. Ongoing maintenance and graffiti protection is now a significant cost to the owner.

FABRISHIELD Paint Repellent (PR) is permanent, does not alter surface appearance and passes efflorescence and vapour.
